Choosing the Right Forex Broker

To unlock the full potential of your Forex robot, you'll need an account with a Forex broker. The robot can only place trades when connected to a broker's trading platform, which makes choosing the right one a critical step to your success.

While there are many brokers available, not all of them are suitable for automated trading. The wrong choice can mean slow executions, high fees, or even limited platform support. That's why we highly recommend partnering with a broker that we know works seamlessly with this robot.

Here's what makes a great broker for your robot:

- ✓ **Proven Compatibility** – 100% reliable with MT4/MT5 platforms.
- ✓ **Tight Spreads & Low Fees** – So you keep more of your profits.
- ✓ **Fast Execution** – Because every millisecond counts in automated trading.
- ✓ **Trusted & Regulated** – Trade with peace of mind knowing your funds are secure.

💡 **Our Top Pick:** To save you the hassle of searching, we've partnered with a broker we personally prefer for using this robot. They tick all the boxes above and have been tested for smooth, reliable performance.

Forex Geek Free Robot Setup

In order to attach the Forex Geek Free Forex Robot to your charts within MetaTrader 4/5, you will need to place the required files into the correct folder of the MetaTrader installation directory. This section will describe where you should place the files ready for use. Please ensure you restart MetaTrader after moving the files so that they will appear in the navigator window of the client terminal. Make sure you test on a demo account first and foremost.

- First locate the Forex Geek Free Forex Robot (ex4/5) file on your computer. Once located, move the Forex Geek Free Forex Robot (ex4/5) file into the “experts” folder of the MetaTrader directory. To find this directory, go to the terminal and click file from the top left-hand corner and then click “open data folder”. From the data folder that has opened you must navigate to “MQL4/5”. Move the Forex Geek Free Forex Robot (ex4/5) file into the “experts” folder. Restart the terminal. You should now see the Forex Geek Free Forex Robot in the “expert advisors” drop down menu of the navigator window. If you cannot see the navigator window load it from the main menu in MetaTrader by selecting the “view” drop down menu.
- Now click “tools” in the MT4/5 main menu then “options”. Under the expert advisor’s tab make sure you have ticked only: Allow automated trading and Allow DLL imports.
- You now need to open a chart to run the Forex Geek Free Forex Robot on. Choose any currency symbol and right click it then select “chart window” to open a chart for that currency pair.
- You are now ready to attach the Forex Geek Free Forex Robot to the chart. Drag and drop the Forex Geek Free Forex Robot from the navigator window onto the chart. You will be displayed with a window. This window is where you set common expert advisor properties and the unique input settings of the Forex Geek Free Forex Robot. In the

common tab you need to enable the Forex Geek Free Forex Robot. To do so, tick the boxes: “enable alerts”, “allow live trading”, “allow DLL imports” and “allow import of external experts”.

- If you have set the common setting of expert advisors correctly then a smiley face will appear in the right-hand corner which means that the Forex Geek Free Forex Robot is active on that chart. If you have clicked “ok” and have a sad face displayed in the top right-hand corner of the chart, this means that expert advisors are not enabled (Forex Geek Free Forex Robot will not work). To enable expert advisors, click the “expert advisors” button which is normally located near to the top of the trading platform. You may also need to navigate to “tools” from the top menu and select “options” then in the expert advisors tab ensure you have only checked the tick box for “allow automated trading” and “allow dll imports”.

Input Settings

All technical indicators and candlestick patterns set to true must agree on the conditions for there to be a trading signal. If you do not want to use candlestick patterns then you can set “No Pattern” to true. You create your own strategy and should always test on a demo to begin with.

- **Pop Up Alerts** - Set to true if you would like to be alerted with a pop-up window when the trading conditions you set are met. Alert is once per bar and only applied to the currency chart running my free forex robot. If you want alerts from multiple currency pairs then you will need to run it on the currency pair of each chart you want trading signals from.
- **Email Alerts** - Set to true if you would like to be alerted via email when the trading conditions you set are met. Alert is once per bar and only applied to the currency chart running my free forex robot. If you want alerts from multiple currency pairs then you will need to run is on the currency pair of each chart you want trading signals from.
- **SMS Alerts** - Set to true if you would like to be alerted via email when the trading conditions you set are met. Alert is once per bar and only applied to the currency chart running my free forex robot. If you want alerts from multiple currency pairs then you will need to run is on the currency pair of each chart you want trading signals from.
- **Use Trading** - Set to true if you want the EA to enter and manage positions based on your settings.
- **Days Filters** - Choose the days you would like to trade.
- **Hours Filter** - Choose the hours you would like to trade.
- **Close At Time** - Close all positions at a certain time.
- **Close Hour** - Hour to close trades.
- **Close Minute** - Minute to close trades.
- **Close Friday** - Close all positions at a certain time on Friday.
- **Close Hour Friday** - Hour to close trades on Friday.
- **Close Minute Friday** - Minute to close trades on Friday.
- **Magic Numbers** - Choose the order ID's for buy and sell trades.

- **Maximum spread/slippage** - Do not trade if the spread or slippage is greater than these values (in pips).
- **Open Orders Limit** - The maximum amount of open orders allowed on each pair at any one time.
- **Lots** - If you set risk to false then you must set fixed lot size here instead. Make sure that you use a sensible lot size for your account balance
- **Risk %** - % of free margin to risk per trade. The risk % is calculated by dividing the free margin by 100 and then multiplying this figure by the risk. This gives us the amount in \$ value that we will risk for the trade so we divide that by the stop loss which gives as the value per lot.
- **Stop Loss** - Stop Loss distance from entry.
- **Take Profit** - Take Profit target.
- **Hedging Allowed** - Set to true or false depending if it is possible to have a buy and sell trade open at the same time.
- **Use Equity Check** - Set to true if you want to check the account equity to see if it falls below the minimum equity or goes above the maximum equity. This will cause all open positions to close and the EA to terminate.
- **Min Equity** - If the equity falls below this value then close all open positions and terminate the EA.
- **Max Equity** - If the equity goes above this value then close all open positions and terminate the EA.
- **Use Break Even** – Set to true or false depending on if you want to use a break even on trades.
- **Break Even** - Distance in profit when the stop loss is moved to the entry price.
- **Use Trail** – Set to true or false depending on if you want to use a trailing stop on trades.
- **Trailing Gap** - Trail price by this distance once break-even point is reached.
- **Close Percent** - Percentage of the trade to close once break-even distance is reached.
- **Min Lot Close** - The minimum amount of lots once reached the break-even will stop closing a percentage of the trade.

- **Moving Average** - Buy if price is above simple moving average; sell if below simple moving average.
- **SMA** - Period of simple moving average
- **Envelopes Reversal** - Buy if price is below lower envelope; sell if price is above upper envelope.
- **Envelopes Breakout** - Buy if price is above upper envelope; sell if price is below lower envelope.
- **Envelopes Period** - Period of envelopes
- **Envelopes Deviations** - Deviations of envelopes
- **Parabolic Sar** - Buy if parabolic sar is below price; sell if parabolic sar is above price
- **Parabolic Sar Step** - Parabolic sar step
- **Parabolic Sar Maximum** - Parabolic sar maximum
- **Bollinger Bands Breakout** - Buy if price is above upper Bollinger band; sell if price is below lower Bollinger band.
- **Bollinger Bands Reversal** - Buy if price below lower Bollinger band, sell if price is above upper Bollinger band
- **Bollinger Bands Period** - Period of Bollinger bands
- **Bollinger Bands Deviation** - Deviations of Bollinger bands
